

welcome home.

Let's change the world.

Data Software Engineer

At Runtastic we believe in helping people improve their fitness and overall health. Moreover, we believe in creating an exciting work environment in which we can thrive **personally, professionally...** and **even physically**. Team members from all over the world get together in our inviting offices to tackle **unusual and fascinating challenges** every day. We offer a **number of benefits** and let our creativity run wild on our **Days of New Ideas**. Because only if our employees are happy can our hundreds of millions of users be happy too.

 **FULL TIME**

 **LINZ**

YOUR MISSION

As our new Data Software Engineer, you will join our data team in building our central data platform and making use of the treasury of data. Your tasks will include:

- Integrating data from various sources into our analytics platform (based on Hadoop, MS SQL Server, and Qlik)
- Developing data models and schemas together with our squads
- Creating and implementing data science models in collaboration with data scientists, developing data products based on machine learning and running them in production infrastructure
- Managing and curating the available data to assure its quality and availability
- Operating and continuously improving the data architecture and toolset to fit the evolving requirements of an agile business

YOUR PROFILE

- Degree in Business Informatics, Computer Science, or a related field (university or higher technical institute)
- Advanced programming skills in at least one language (i.e. *Python, Java, R, C#, MDX/DAX*)
- Ability to convert complex business systems and requirements into technical concepts and solutions
- Preferably, professional experience in using Hive, Spark, Flume, T-SQL, SSIS, SSAS, and SSRS
- Passion for new technologies and for creating value from data in a fast-changing environment
- Very good English skills
